Work in progress

- We are currently investigating ecotoxicity of number of TCEs to aquatic species (algae, bacteria, protozoa and crustaceans).
- The first results will be presented at the conference “Interfaces Against Pollution” 2016 (IAP 2016), Lleida, Catalonia, Spain.

Presentation 1 : Ecotoxicological evaluation of technology-critical elements

Presentation 2 : Effects of (doped) rare earth oxides on algae, bacteria, protozoa and crustaceans
